## O NAMA

ŽILIC KAMEN je obrt osnovan 2001 godine čije su glavne djelatnosti eksploatacija i prodaja prirodnog pločastog kamena kako na domaćem tako i na inozemnom tržištu.

Odličnom organizacijom obrta i predanošću poslu koji obavljamo te dugogodišnjem iskustvu distribuiramo kvalitetne proizvode o čemu svjedoče mnogi zadovoljni kupci.

Stalnim ulaganjem u tehnologiju i kadrovske potencijale još više poboljšavamo svoje proizvode i usluge te ih distribuiramo na nova tržišta.

## POVIJEST BENKOVAČKOG KAMENA

Na ovim prostorima kamen koji danas poznajemo kao benkovački arhitektonski kamen je bio jedini pogodni materijal za gradnju, stoga povijest eksploatacije kamena seže još u davna vremena kad su se ovi prostori tek počeli nastanjivati, a o čemu svjedoči liburnsko-rimski grad Asseria (IV stoljeće prije Krista), te mnoge druge povijesne građevine.

Kako je kamen bio poznat materijal za gradnju u tradicionalnoj arhitekturi, tako je i zbog svoje primjenjivosti na svim vrstama objekata poznat i u modernoj arhitekturi.

## ABOUT US

*ŽILIC KAMEN is founded in 2001, whose main activities are exploitation and selling natural stone on both the domestic and international markets.*

*Excellent organization and commitment to work that is done and many years of experience distributing quality products, evidenced by many satisfied customers.*

*By constantly investing in technology and human resources further improving our products and services as well distributing them to new markets.*

## HISTORY OF THE STONE FROM BENKOVAC

*In this region the stone that we know today as benkovac architectural stone was the only occasional building material, therefore, the history of stone exploitation dates back to ancient times when these spaces only begun to inhabit, evidence of which is Liburnian-Roman city Asseria (fourth century BC ), and many other historic buildings.*

*As the stone was known building material in traditional architecture, it is also due to its applicability to all kinds of objects known in modern architecture.*
